Forensic courses, both in high school and in college, continue to grow in popularity just as forensic science continues to expand as a career. Students are recognizing that all crimes are not solved in a one-hour segment, as on their favorite TV shows. But they are also recognizing, through courses like this one, that forensic science offers a wide range of opportunities for chemists, biologists, geologists, physicists, artists, photographers, mathematicians, historians, and others who are interested in bringing arts and sciences together with criminal justice.
